

CUBE
CONSULTING

Champaign-Urbana Business & Engineering Consulting

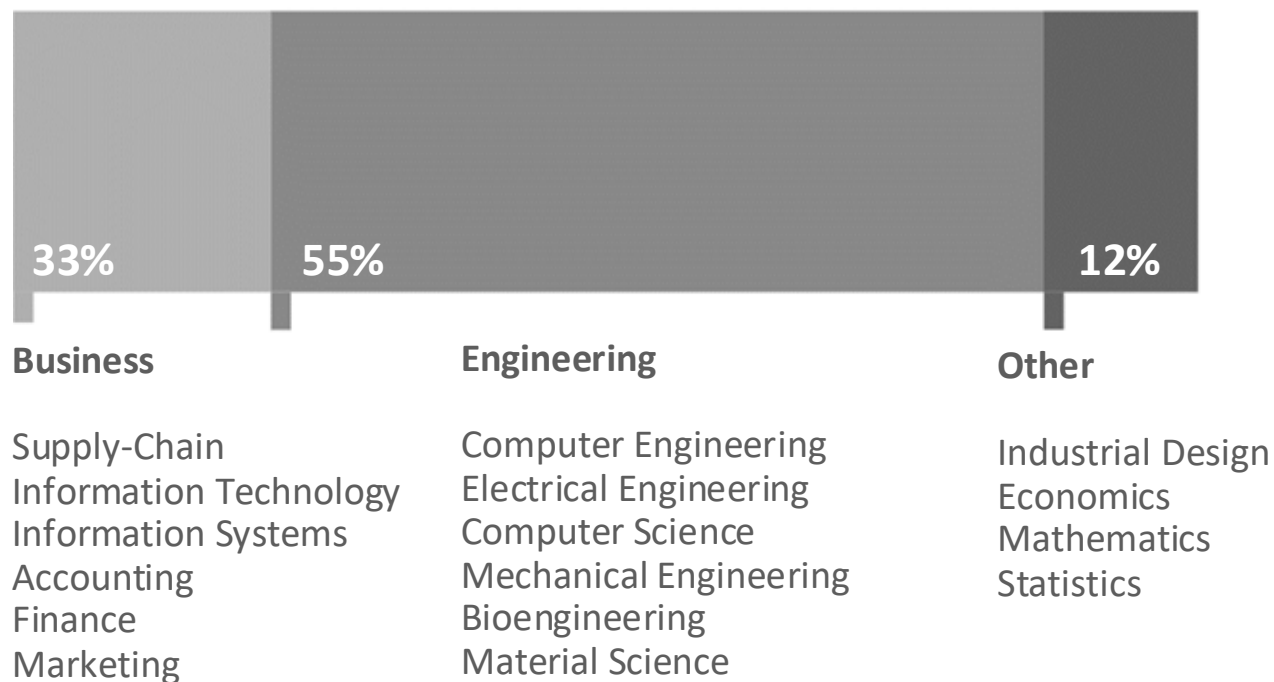

Who We Are

Our Team

We keep a team of **70+** consultants within our organization split between **8-10 projects**. Each semester, we receive 300+ applications from UIUC students and **select ~10%** to onboard on these projects.

Within CUBE, all consultants are provided with weekly **technical and professional workshops**.

It's a strict policy of ours to be **honest and open** in our work and progress. We strive to be **professional and impactful leaders**.

Why CUBE?

Services

Project Types

Engineering

- Product prototyping & testing
- CAD modeling & simulation
- Technical feasibility analysis
- Hardware design optimization
- Process automation
- Materials & systems analysis

Business

- Market sizing & segmentation
- Finance modeling & forecasting
- Pricing & cost optimization
- Operations streamlining
- Go-to-market strategy
- ERP & system integration

Technology

- Software Development
- Data modeling and simulation
- Machine learning modeling
- AI workflow automation
- UI/UX prototyping and testing
- LLM integration tools

Our Clients

Industries Served

Consumer Goods and Services – Energy - Electronics and High Tech – Healthcare - Life Sciences - Retail

PSYONIC

Panasonic

Testimonials

"The CUBE team did a thorough job of helping us to determine possible workflows for our company. They are also very unique in that they provide engineering and design services as well. Being able to combine both the business and engineering definitely gives CUBE an edge over other consulting groups."

Aadeel Akhtar, CEO, Psyonic

"Lucky us! We at Inprentus enjoyed working with the University of Illinois Urbana-Champaign Champaign Urbana Business and Engineering (CUBE) Consulting Group on a spring project. CUBE is a student-led RSO with students studying both business and technical subjects. The group offered great analyses to achieve further momentum in the AR market with our revolutionary blazed waveguides. Looking forward to a fall follow-on project!"

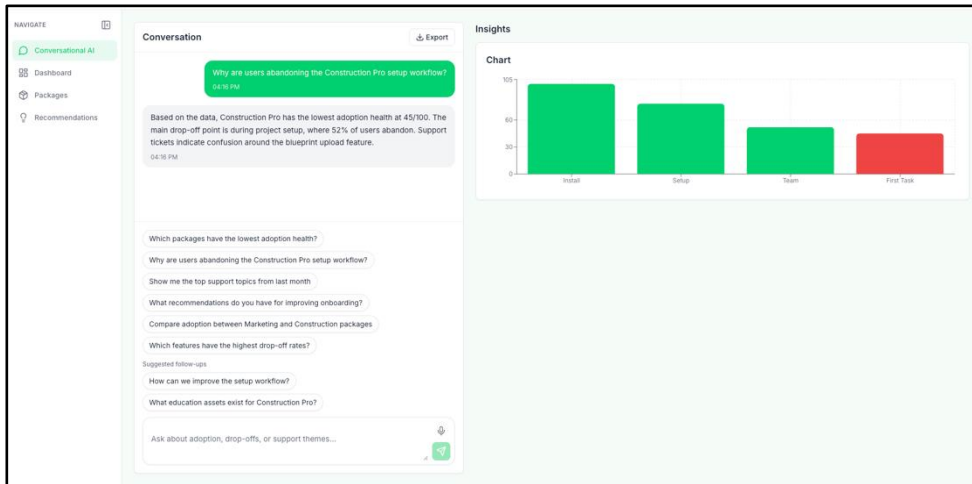

Cynthia Otteman, Chief of Staff, Inprentus

Project Examples

Project Scope

CUBE partnered with Wrike, a platform that optimizes and creates tools to improve workflows. The project revolves around **interviewing stakeholders of Wrike's Customer Solutions and Innovation team, to identify and curate AI solutions** to their manual problems

- Pinpoints exactly **where and when** users drop off within workflow tools
- Uses machine learning (built in PyTorch) to **uncover hidden patterns** in user behavior

Timeline

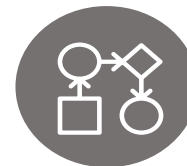

Research

Interview Wrike CSI sub teams stakeholders to understand their initiatives that could be **automated**

Scope

Understand where we could **provide business value**, and curate specific solutions to be presented to Wrike

Development

Develop a tool that **solves Wrike's business problem** of not understanding when a customer does not adopt their workflow solution

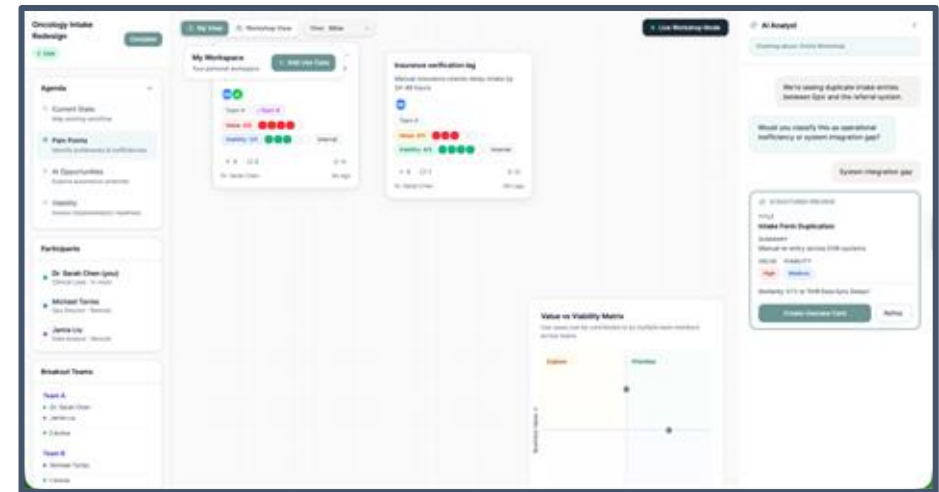

Testing

Create various **test cases**, find and eliminate **bugs** so our tool can be used within Wrike internal system

Optura AI

Project Scope

CUBE partnered with Optura to develop Workshop Mode, an AI-assisted capability that supports structured discovery workshops from preparation through post-workshop synthesis. Workshop Mode centralizes workshop inputs, collaboration, and outputs to turn ideas into Minimum Viable Business Cases

Frontend and Backend

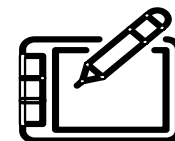

Developed the core Workshop Mode platform using **SvelteKit**, **TypeScript**, **PostgreSQL**, and **Drizzle ORM**, enabling users to create workshops, submit ideas, and collaborate across breakout teams

AI Analyst

Implemented an **AI analysis layer** that summarizes discussions, identifies common themes across teams, and **generates structured insights** that turn ideas into **actionable recommendations**

Relevant Skills

- Product Ideation & Design
- Full-Stack Development
- Backend & Real-Time Systems
- AI & LLM-Powered Analysis
- UI/UX Prototyping (Figma)

■ Panasonic

Project Scope

CUBE partnered with Panasonic to assist them in conducting market research regarding various use cases of data/automation within the manufacturing industry. The purpose of this project was to identify areas where Panasonic could keep up with ongoing technology trends and adapt their new software.

Internal Research

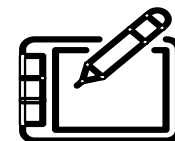

Conducted research using internal documentation and meetings with Panasonic executives to evaluate their new software

Primary Research

Reached out to 700+ individuals/companies at other manufacturing firms to interview and gauge how they integrate data/AI

Panasonic Incorporation

Created a thorough recommendation plan for how Panasonic should adjust their software to current data needs

AWS

Project Scope

CUBE partnered with AWS to implement AI-based solutions to improve efficiency and create automated solutions. The project involves **interviewing subject matter experts to create an AI solution** for their daily problems

Meeting Agent Overview

Pre Meeting

Upload **documents** to provide context and select individual's role to provide **tailored experience** throughout the meeting with questions/target items

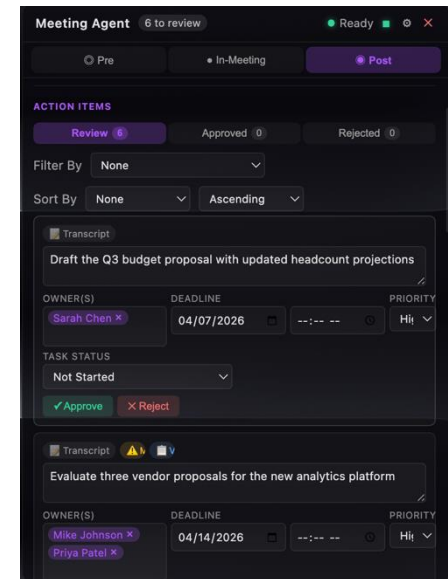

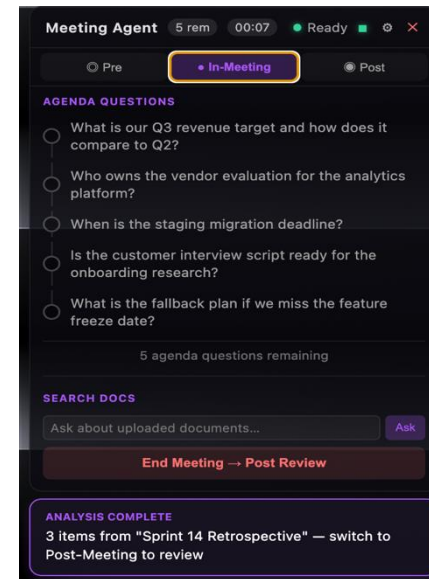

In Meeting

Ask **direct questions** that align with proper context and ensure that each meeting is structured

Post Meeting

Follow through meetings with clearly defined **action items** automatically added to Google Calendar and follow up emails constructed

Technology Stack

- Fireflies
- Gemini
- Electron
- JavaScript
- Python
- Flask

AllPeople

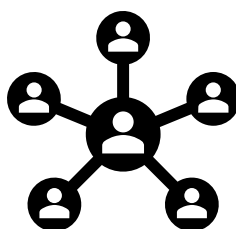

Project Scope

CUBE partnered with AllPeople, a pre-revenue sustainable marketplace, to conduct **market research**, build an **outreach playbook**, develop **financial models**, and **support investor acquisition** and launch

Growth Flywheel

Outreach Playbook

- Compiled list of **100+** organizations for outreach
- Created optimized **survey** to vet investor preferences
- Ideated **go-to outreach playbook** for company use

- **Advertising Segments**

Inprentus

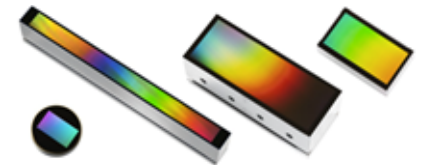

Project Scope

CUBE partnered with Inprentus, a precision optics manufacturer, to conduct in-depth **market research on EUV and DUV diffraction gratings** and **develop cost models and a PR strategy** to position them as a preferred supplier.

Relevant Skills

- Market Research
- Financial Modeling
- Data Analysis
- Networking/Communication

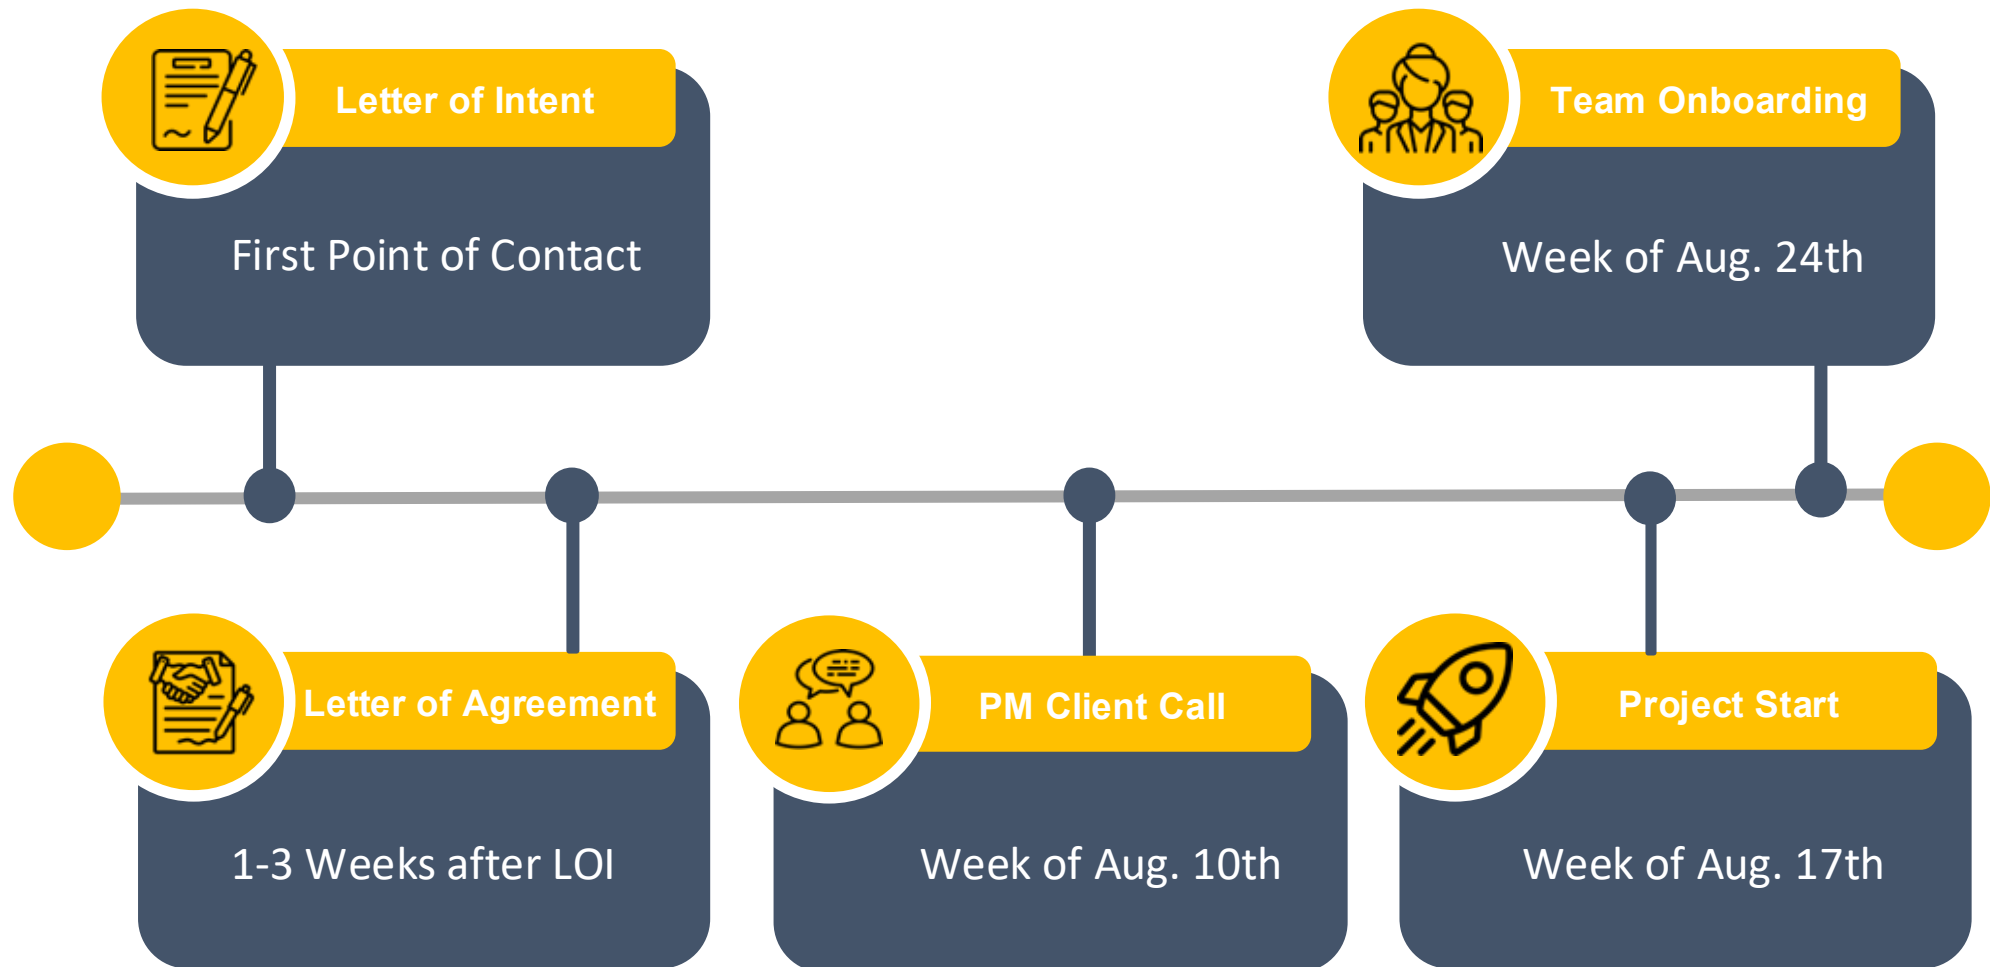

Project Logistics

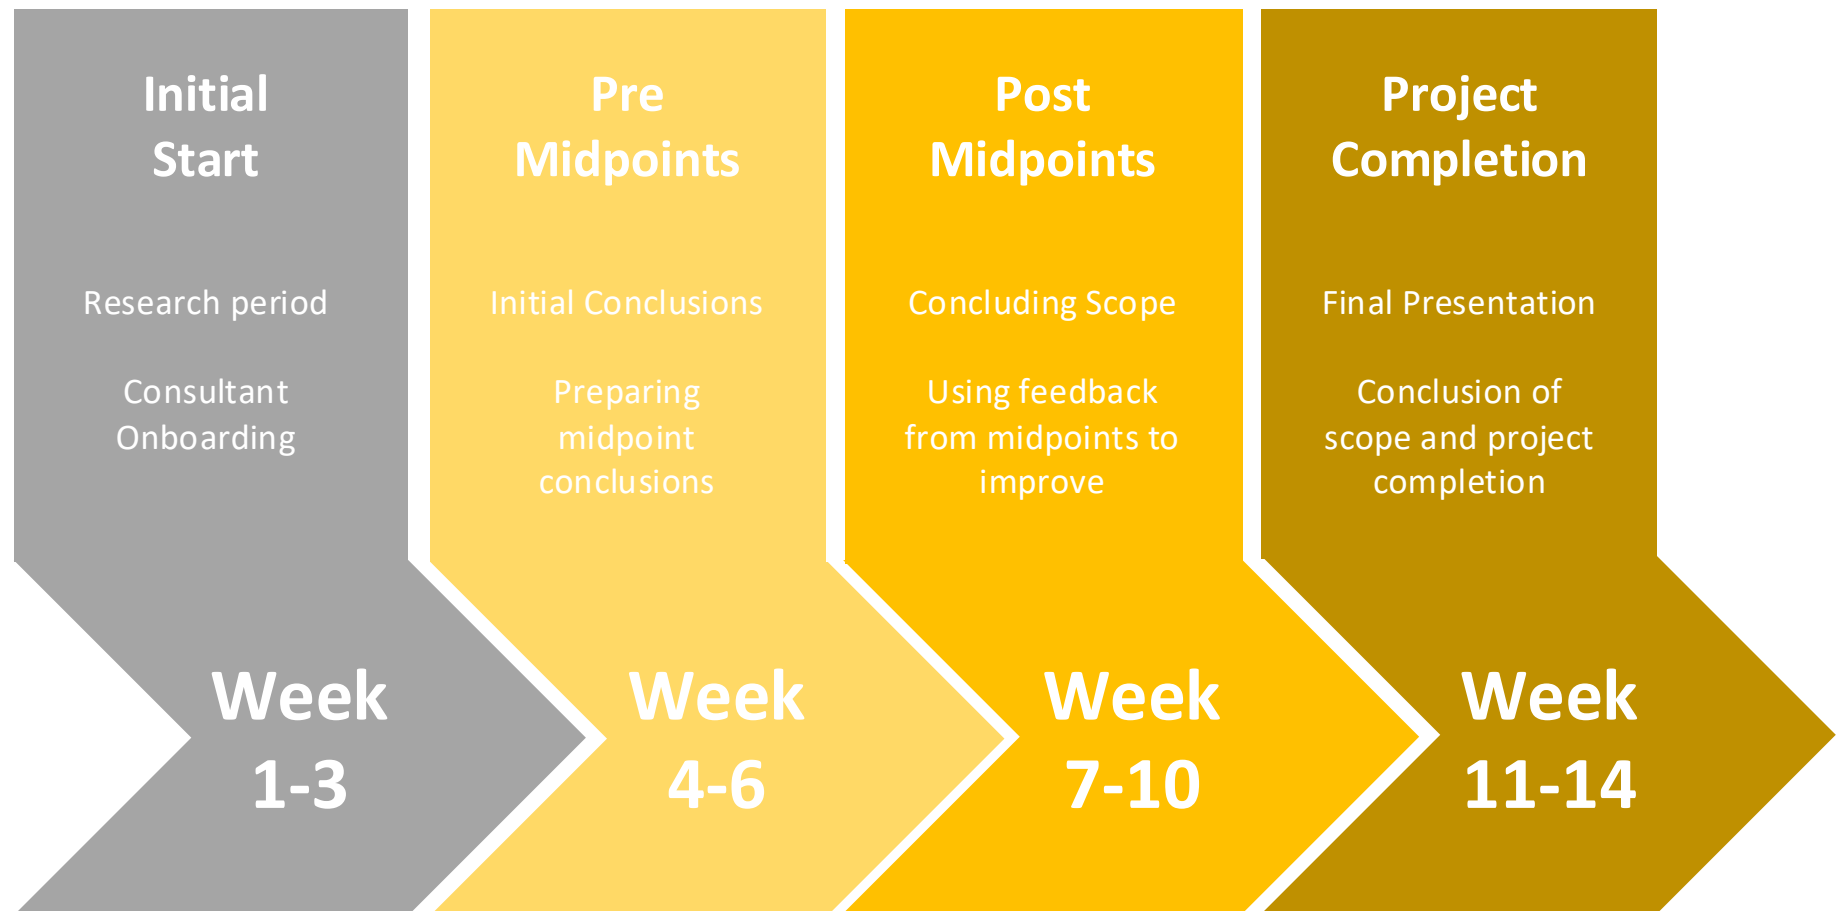

Project Team Breakdown

Pre-project Overview

Project Timeline

Client Expectations

Client Meetings

Projects will require weekly/biweekly 1-hour meetings for engagement between project team and client point of contact

Email Responses

Client point of contacts are expected to respond to project managers within a reasonable timeline to maintain project flow

Deliverable Feedback

Clients are expected to provide thorough feedback to ensure high quality deliverable output

Next Steps

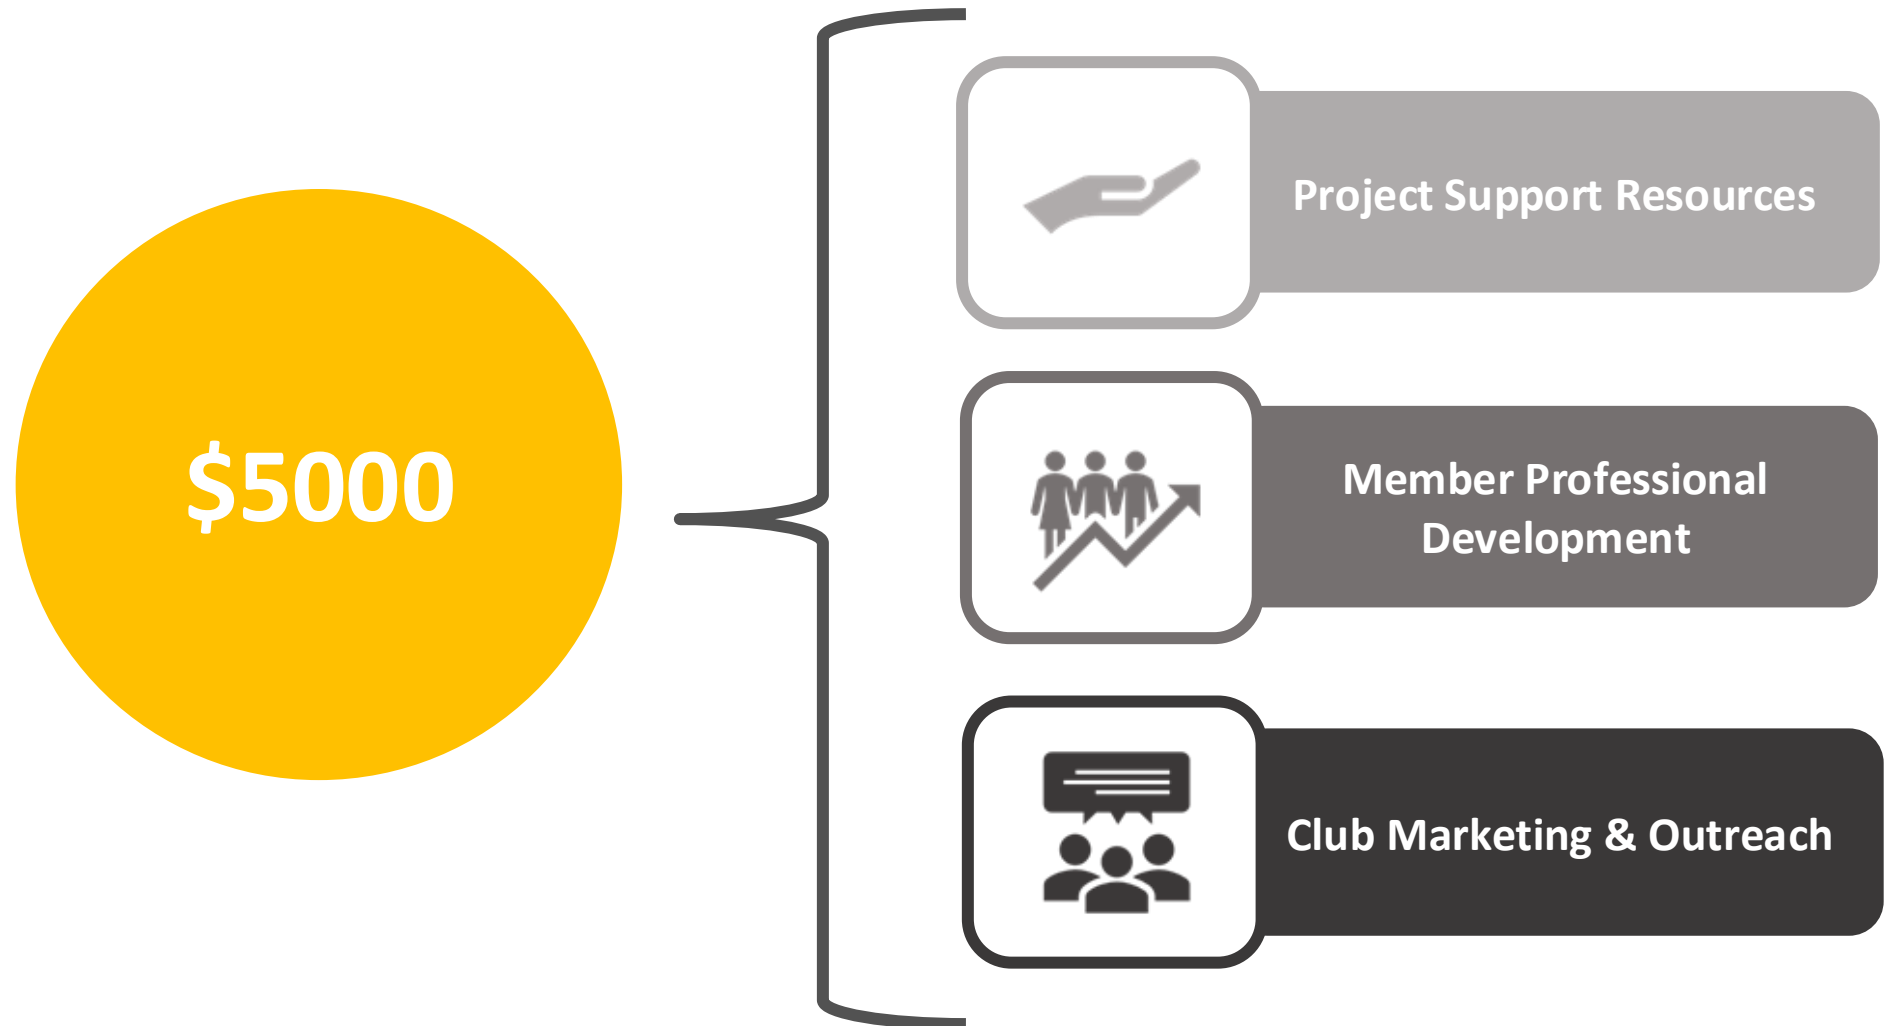

Letter Of Intent

Letter of Intent includes clauses **detailing signing parties, joint accountabilities, down payment, and terms and acceptance**. This legally binds the company to be doing a project with CUBE for the coming school semester.

After we have established that there exists a project scope that CUBE can provide a tangible final deliverable for, we will continue to refine the scope in the next meeting with our Quality Assurance Managers. From there, in a couple weeks, we will move on to the next step of solidifying the scope and signing the **Letter of Acceptance**.

At the end of this meeting, **Adrian Mittal** (Project Acquisition Director) will be sending the **LOI template** for the company to fill out and send back to Adrian by **August 5th, 2026**.
